

Botany in vc77 - Lanarkshire

Fieldwork Programme, 2019

Here is the first instalment of our programme for 2019. You will receive updates as the programme evolves.

(Some events planned by other organisations may be included in italics for your interest.)

We are hunting for 'new finds' (things not seen in a place before) or 're-finds' (things listed in a place before, but not found again this century so far.)

We work in tetrads (2x2 map squares) or monads (single map squares). We have listed below the monads we are targetting (e.g. **NS6273**).

Some of the locations are remote, or suffer from restricted access or parking. It is therefore more important than ever that we know who will be present.

If you wish to take part in any event, **please email or text both Michael Philip and Peter Wiggins no less than 24 hours in advance.**

It would also be helpful to have a note of your mobile phone number, in case of any last-minute alterations or hitches.

Sometimes finding the meeting-place will require some navigation skills! The grid references below will be more accurate than the postcode/satnav method. Please allow enough time to arrive on time. We expect reasonable standards of time-keeping, only because latecomers hold back the group. If you know you're going to be late, please phone (the mobile numbers are given below).

Michael's car is a blue Honda CR-V and he wears a red jacket. Peter's car is a blue Toyota C-HR and he wears a dark jacket.

We recommend that you bring your own food and water with you (less crucial for afternoon or evening events).

Finally, please be aware that your participation in any of these events is at your own risk. We have indicated on the programme the kind of terrain to expect.

Take precautions over clothing and equipment, and be sensible about steep or boggy ground, climbing gates or fences, and pacing yourself. Thank you.
